## PURITY HCHF Hot Filter

**When only bold coffee, fine tea,  
and perfectly steamed food will do.**

The PURITY HCHF Hot Filter is engineered for high capacity and high flow, ideal for cafés and foodservice environments serving hot beverages.

Its efficient filtration ensures optimal water quality, enhancing flavor and protecting equipment from scale buildup. This reliable filter supports consistent hot drink preparation while maintaining operational efficiency during peak demand. Made in the USA.

### Compatible with the following filter heads:

PURITY HCHF Filter Head and 3M High Flow (HF) ICE, BEV, BREW, and CLX Series head and manifold assemblies.

| HCHF HOT FILTER       |                                                                      |
|-----------------------|----------------------------------------------------------------------|
| Micron                | 0.2 µm                                                               |
| Claims                | Scale Inhibition, Cyst, Turbidity, Sediment, Chlorine Taste and Odor |
| Flow rate             | 3.4 gpm                                                              |
| Capacity              | 40,000 gal                                                           |
| Dimensions            | 4.5 x 14 inch                                                        |
| Operating Pressure    | 25-125 psi                                                           |
| Operating Temperature | 35-100 F                                                             |

## Systematic filter technology

### 1 Pre-filtration

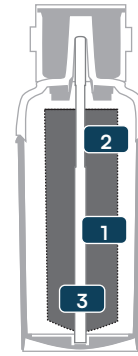

Before entering the carbon block, a filter retains coarse particles.

### 2 Activated carbon filtration

Substances that affect the taste and aroma are removed. The particularly fine pores (0.2 micron) ensure outstanding retention of particles. All raw water flows through the carbon block from the outside inwards.

### 3 Scale inhibition

Polyphos filter medium prevents limescale formation on equipment.

The illustration serves as explanation of the filter technology. It is not to scale.

## Quality and safety

### Optimum water quality

Outstanding and consistent water quality — free of unwanted taste and aroma elements.

### Maximum product safety

For uninterrupted operation and safe use.

### Simple to use

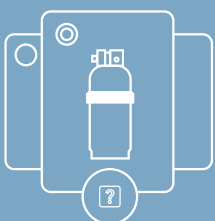

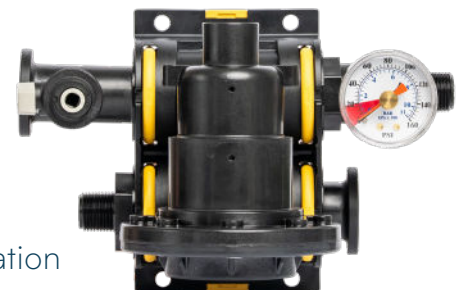

Operation is simpler and easier than ever.

Certified by NSF International against NSF/ANSI standard 42 & 53 for the reduction of Chlorine, Taste and Odor, Cyst.

## PURITY HCHF Filter Head features:

- Modular build provides ability to easily expand in the field
- No special tooling required for install or modifications
- Valve in Head design, providing simple one step filter changeout
- Built in Level for easy quick installation
- Reversible / Same Side in/out flow to accommodate custom installation
- NSF Certified
- Made in USA

### Product Selector and Capacity Calculator

Our online tool for sourcing the correct filter, capacity calculation, and timely filter change reminders.
